

600 × 400

mantroOps

Built for the operational realities of African engineering teams.

PROJECT KICKOFF | JULY 2024

The Core Mission

We aren't building a generic CMMS. We are building a platform for how African engineering teams actually work.

Who We Are Building For

-  **Target Market:** Mid-size Ghanaian contractors, service firms, and fabricators.
-  **Status Quo:** Heavy reliance on spreadsheets or outdated paper logs.
-  **Opportunity:** Accessible, affordable tech built for the engineering context.

Why Global Software Fails

Connectivity

Cloud-only tools break in remote sites like Obuasi or Takoradi. Offline access is non-negotiable.

The WhatsApp Loop

Approvals happen on chat, leaving no audit trail for GNPC or EPA compliance. We bridge that gap.

Local Logistics

USD pricing and lack of GHS vendor tracking makes global tools functionally irrelevant.

| One Product, Two Experiences

Desktop Dashboard

Built for managers to handle full asset setup, configuration, and deep compliance reporting.

Field-Ready Mobile

Simple tech for technicians to scan QR codes and log jobs offline with automatic sync.

Where We Win

Factor	Global Tools	mantroOps Platform
Connectivity	No / Limited offline	Full Offline-First Capability
Alerts	Email/App only	Built-in WhatsApp & SMS alerts
Procurement	USD only	GHS + Local Vendor Tracking
Compliance	Generic	One-tap EPA & GNPC Reporting
Setup	Months to onboard	Onboard in days

Small Team, Fast Execution

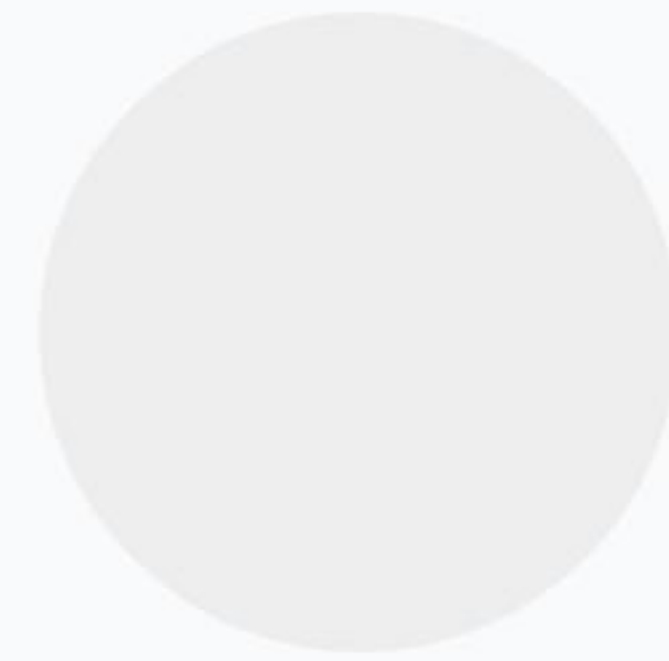

Product & Tech

MVP Build & Vision

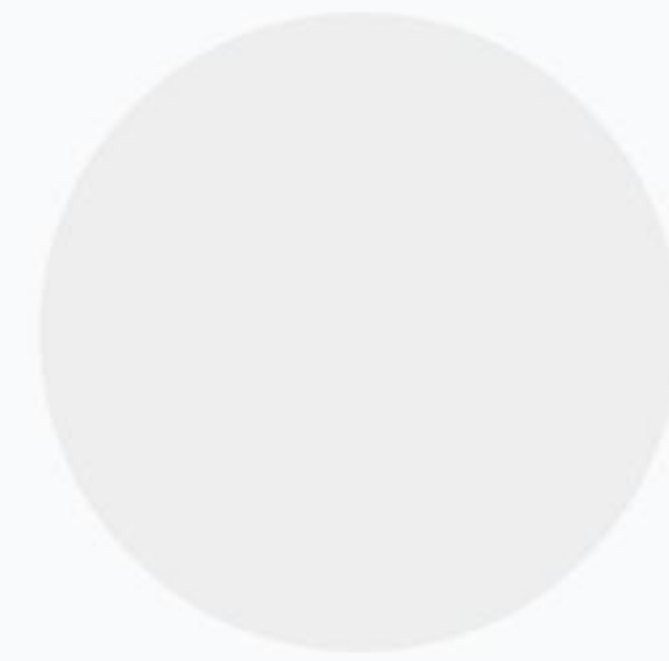

Sales & BD

Closing Pilot Clients

UI/UX Design

Field-Ready Clarity

Operations

Smooth Onboarding

Relationship-Driven Growth

Phase 1: Warm Outreach - Problem validation chats with existing local engineering connections.

Phase 2: Pilot Program - 3-month pilots to document real-world downtime reduction.

Phase 3: Referrals - Leverage GhIE visibility to scale trust-based growth.

Immediate Actions

- ✓ Confirm final team responsibilities.
- ✓ Begin validation calls with 5-10 firms.
- ✓ Kick off Tech Build Sprint #1.
- ✓ List top early pilot partners in Accra & Tema.

Let's build this.
